

ABOUT ME

With an Italian-Greek background, I have been living in Australia for 10 years now, where I have settled my own family. I have always had a strong passion for web development. Although I haven't had professional experience in the field yet, I have spent several years dedicated to self-learning and developing foundational skills in web development. Through online courses, tutorials, and personal projects, I have acquired a solid understanding of HTML, CSS, and JavaScript. My self-driven approach to learning, coupled with a natural aptitude for grasping new concepts quickly, has equipped me with the ability to adapt in new environments. I am ready to bring my skills and passion to the next level and finally make it my profession.

EXPERIENCE

JUNIOR FRONT-END DEVELOPER

SELF-EMPLOYED

Sep 2023 - Current

- Proficient in HTML, CSS, and JavaScript, with a strong emphasis on building responsive and visually appealing user interfaces.
- Basic experience in modern front-end frameworks such as React and Bootstrap to streamline development processes and create dynamic web applications.
- Skilled in front-end tooling and libraries, including Node.js and Express.js, to enhance the functionality and performance of web applications.
- Proficient in version control using Git and GitHub.
- Basic knowledge of integrating databases into web applications, with a focus on relational databases such as PostgreSQL.
- Strong understanding of front-end best practices and standards, with an ability to optimize performance and maintainability of codebases.
- Proactive problem-solver with a keen eye for detail, capable of identifying and resolving issues in a timely manner.
- Passionate about staying updated with the latest trends and technologies in front-end development, continuously expanding skills and knowledge base.
