[MY PORTFOLIO](#)

CAREER OBJECTIVE

I have built a successful career in sales and management, particularly within the agricultural sector, where I developed strong communication, problem-solving, and customer service skills. Currently, I am pursuing studies in web development, focusing on modern technologies. I am eager to transition into the tech industry as a Web Developer and I'm seeking for new challenges to keep me motivated, growing my skills, and helping build websites and apps that make a real difference for people.

EDUCATION

KEY PROJECTS

Rental Car Booking Website

2024 |  [Live Demo](#)

- Built a full-stack car rental platform using the MERN stack.
- Real-time booking with vehicle availability, date selection, and checkout.
- Admin dashboard with full CRUD for vehicles, users, and bookings.
- Integrated Stripe for secure payments and Cloudinary for car image uploads.
- Revenue chart for tracking booking income.
- JWT & cookie-based role-based access control.
- Passwords hashed securely using bcrypt for authentication.
- Filtering and sorting system for better user experience.
- Responsive UI styled with Tailwind CSS

Plant E-Commerce Platform

2024 |  [Live Demo](#)

- An e-commerce site for plant products using the MERN stack.
- Secure authentication with JWT, role-based admin/user access.
- Product reviews, filtering, search, and sort functionality.
- Payments via Stripe, image uploads with Cloudinary.
- Efficient data handling using Redux Toolkit Query.
- Responsive and modern UI with Tailwind CSS.

Budgetmate

2024 |  [Live Demo](#)

- Finance and contact management app with full-stack features.
- User registration/login with MongoDB & JWT authentication.
- Dynamic income/expense tracker with summaries.
- CRUD contact manager with Firebase image uploads.
- Daily motivational quote integration.
- Dark/light theme and modern UI using Flowbite + Tailwind CSS.
